# About Us

Kimpa Metal, continuously growing and evolving since its establishment, initially met the region's raw material needs through stainless steel, sheet metal, pipe, and profile trading. With a capital increase in early 2020, the company invested in the metal processing sector, establishing a 5000 m<sup>2</sup> facility in Sakarya 1st Organized Industrial Zone. This enabled the company to engage in subcontracting agreements, particularly with foreign origin manufacturing companies in Sakarya and its vicinity.

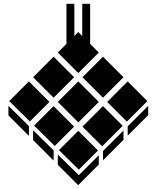

# Quality Policy

Kimpa Metal Industry and Trade LTD. as;

- To establish a Quality Management System meeting the conditions of relevant parties and customer requirements and, within this framework, to produce products conforming to the desired standards and deliver them to customers on time,
- To continuously improve the Quality Management System, set quality objectives for this purpose, and monitor by evaluating risks and tracking opportunities,
- To ensure customer satisfaction, prioritizing customer satisfaction by surpassing expectations with innovative and reliable approaches,
- To ensure that all our employees are conscious of the quality policy and encourage them to work in line with it,
- To take responsibility for every product we manufacture and provide necessary information and technical support to customers,
- To integrate the required quality raw materials, state of the art machinery, and expert workforce,
- To increase the expertise levels of our employees through training and support their work motivation by offering an ergonomic and healthy working environment.

# Values

## Vision

The fundamental vision of Kimpa Metal is to provide easy, safe, economical, and high quality services in the manufacturing industry. Customer satisfaction is prioritized, and the philosophy of total service quality is embraced. The aim is to produce fast, accurate, and reliable solutions with a commitment to 100% quality performance and an approach of flawless service. Continuous improvement is at the core of our vision.

## Mission

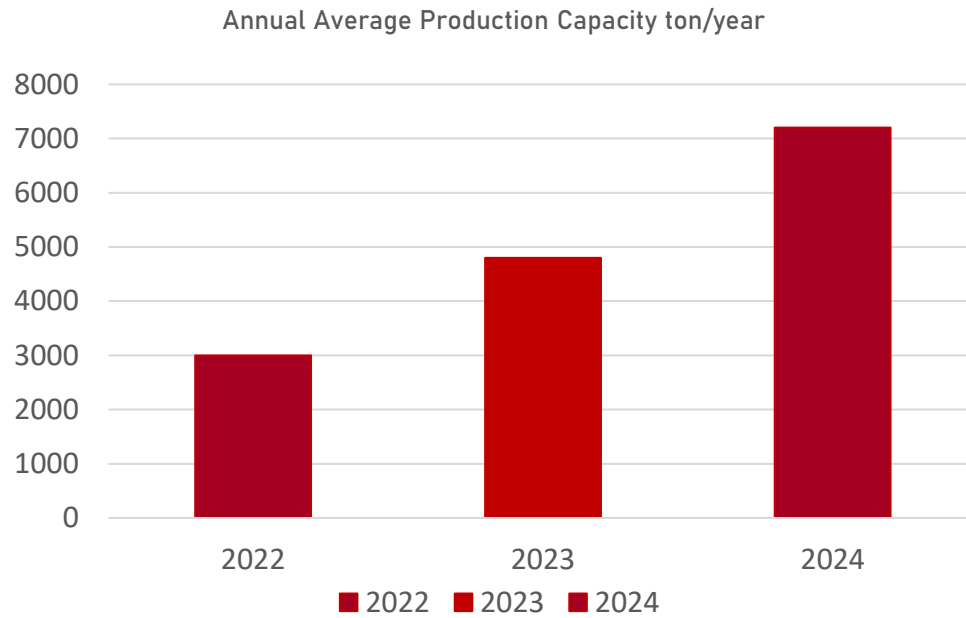

Utilizing state of the art technologies at all times, evolving manufacturing technologies adhere to high quality standards, aiming to prioritize customer satisfaction and embrace a philosophy of continuous improvement. In this context, the goal is to produce products that are respectful to humanity, nature, the environment, and society.

# Goals

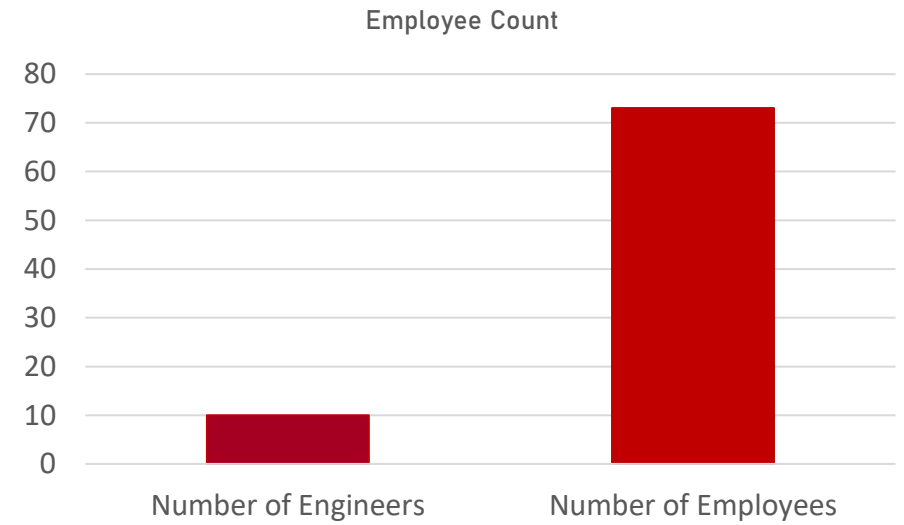

Strategic objectives of Kimpa Metal Industry and Trade LTD. are as follows:

- Ensure efficient use of resources.
- Attain highest level of customer satisfaction in the industry.
- Increase our impact on society and ecosystem.
- Enhance female employment and representation.
- Continuously develop professional skill and expertise, diversify services and expand the customer portfolio.
- Become one of Turkey's significant automotive industry suppliers, increasing domestic and international production activities to meet industry standards.
- Act as a solution partner in customers projects, approaching issues in part based and assembly production with a problem solving focus.
- Diversify energy sources along with employees and utilize renewable energy sources more to minimize environmental impact.

# Production Data

Monthly average production capacity is 550 – 600 ton/month

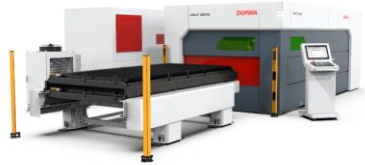

Total number of employees is 76.

## Processes

- Laser Cutting
- Press
- Press Bending
- Threading Process
- CNC Turning - Milling
- Welding Manufacturing
- Quality Control

# Production Machinery

## Laser Cutting Machines

- 2 units of 6kW fiber laser,
  - 1 units of 8kW fiber laser,
  - 2 units of 10kW fiber laser
- There is as cutting machine.

## Press Bending Machines

- 1 unite of 4 meter Press Bending,
- 1 unite of 3 meter Press Bending,
- 2 unite of 1,25 meter Press Bending.

## Press Machines

- 2 unite of 250ton Eccentric Press,
- 3 unite of 160ton Eccentric Press,
- 1 unite of 400ton Eccentric Press,
- 1 unite of 200ton Eccentric Press
- 1 unite of 170ton Eccentric Press,
- 6 unite of 30ton Hydraulic Press,
- 1 unite of 200ton Hydraulic Press.

## Welding Machines

At our location in the 1st Organized Industrial Zone (OSB), we have 2 units, and at our location in the 3rd OSB, we have 67 units of Welding Machines.

## Threading Process (Pipe)

We have a reconfigurable grinding line that can be customized to meet the specific needs of different customers.

## CNC Turning-Milling

We have one milling machine.
